Recovery

Initial Damage Estimates and Preliminary Damage Information:

- Kern County Building, Environmental Health and Sheriff's Office representatives conducted an assessment in Squirrel Valley and South Lake. Public Health teams assessed properties affected by the fire for debris management and initial hazards; and are in the process of reviewing water systems in the area. Building Inspection teams assess safety of the structures and placed a colored tag on each structure: Red means do not enter or occupy structure; Yellow means restricted access, and specific instructions are written on the tag; and Green means lawful occupancy permitted and that no apparent structural hazard has been found.
- Cal OES Public Assistance has deployed two Disaster Assistance Programs Specialists to the Kern County EOC to coordinate hazardous materials debris operations.

Debris and Hazardous Waste Management

- Cal Recycle standing by for situational awareness and possible tasking for debris removal and are in contact with local authorities concerning landfill capacity.
- Kern County authorities will decide whether to use the public health declaration to allow DTSC in to remove the hazardous materials or if signed access agreements will be required from each property owner first (likely to delay work 2-3 weeks). DTSC is in a holding pattern until the decision is made.

Local Assistance Center (LAC)

- Kern County has confirmed the opening of a Local Assistance Center on Friday, 7/1/16 from 1200 hours until 1800 hours at the Woodrow Wallace Middle School, 3240 Erskine Creek Road, Lake Isabella, CA.
- The hours of operations are as follows:
 - Monday – Friday 0900 to 1800 hours
 - Saturday and Sunday 0900 to 1600 hours
- The LAC will operate through Sunday, 7/10/16. The county plans to assess survivor participation to determine whether the LAC will be extended beyond 7/10/16.
- The following agencies are being asked to participate:
 - Representatives from the State: Governor's Office of Emergency Services, Contractors State License Board, Department of Motor Vehicles, Department of Insurance, Employment Development Department, Department of Public Health-Vital Records

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

A deep low pressure area will be off the Pacific Northwest coast through Saturday, then will move inland across Oregon toward the Northern Rockies Sunday and Monday. The low pressure trough associated with the low will be over Northern California through early Sunday, then move into the Great Basin. Temperatures across the region will be as much as 10-12 degrees below normal through Sunday. Gusty southwest to northwest winds can also be expected in most areas. Light rain showers near the main cold front in the far northwest portion of Northern California and will move east across the northern end of the region today. Widely scattered showers are possible through about midday Sunday in the same areas, especially over the higher terrain. There is also be a slight chance of isolated thunderstorms over our far northern areas as well. These storms would be wet, but could still ignite what would become holdover fires. Moderate to locally strong southwest to west afternoon winds are likely to develop near and east of the Cascade/Sierra crest today and Saturday. Winds will be strongest Saturday with gusts of 30-45 mph likely to be rather common, locally near 50 mph is possible. Humidity will be increasing and probably remain above critical levels there, however. Higher pressure with warmer, more seasonable temperatures and dry conditions will return early next week with a chance of some light to moderate northerly downslope winds developing Sunday night/Monday morning.

SOUTHERN CALIFORNIA

An unseasonably deep trough heading into the Pacific Northwest will generate gusty winds over much of the area this weekend. However, today, look for sunny skies and slightly warmer temperatures due to high pressure lying across the area. Highs today will range from the 70s at the coast to the lower 90s in the valleys to 105 in the desert. This ridge will be muscled out of the region by the trough and winds across the Kern County Mountains will increase to 15-25 mph with gusts to 40 mph during the afternoon and evening. Saturday, a tight onshore pressure gradient will cause west winds in the Tehachapi's to reach 20-30 mph with gusts to 50 mph by the morning hours. Along with the gusty winds, expect RH to drop to 10 percent by the afternoon. In addition, strong cross-barrier winds aloft may generate a mountain wave on the Sierras. This would result in wind gusts to 50 mph from the Sierra Crest eastward into the Owens Valley and northern Inyo National Forest. Minimum RH may be around 10% in this area as well by the afternoon. Expect cooler temperatures over the weekend with widespread night through morning stratus returning to the valleys and lower foothills as well as coastal areas from Los Angeles southward. Saturday night, gradients are expected to turn northerly which may generate winds of 15-25 mph with gusts to 40 mph in Santa Barbara County Saturday night through Sunday morning. It will remain very windy in the same areas Sunday, but RH should increase somewhat and temperatures are expected to be 5-10 degrees cooler. All winds will relax Monday. It will remain relatively cool during the first half of next week with temperatures remaining in the 80s in the interior valleys. High pressure is expected to bring a strong warming trend beginning next Thursday which should send valley temperatures back over 100 degrees. No "monsoonal" thunderstorm activity will occur throughout the period.
